You will see..

## Great Hornbill

With a long, curved bill and a bright upturned casque on their heads, the hornbill arguably has the most interesting profile amongst their feathered brethren. It's not only the symbol of the Malaysian Democratic Action Party, but it is also an important symbol for tribes in East Malaysia

## Fish Eagle

The skies above Langkawi are dominated by magnificent Birds of Prey, the most conspicuous of which are the White-bellied Fish Eagle *Haliaeetus leucogaster* and the Brahminy Kite *Haliastur indus*. Both these species are adept at swooping down and plucking unwary fish from the shallow, sandy bays.

## Purple Swamphen

The Purple Swamphen is a large rail. It is mainly dusky black above, with a broad dark blue collar, and dark blue to purple below. As the Purple Swamphen walks, it flicks its tail up and down, revealing its white undertail. The bill is red and robust, and the legs and feet orange-red. For such a bulky bird, the Swamphen is an accomplished flier and will readily take to the air to escape danger.

## Red-wattled Lapwing

The Red-wattled Lapwing is a largish lapwing large plover in the family Charadriidae. The wings and back are light brown with a purple sheen, but the head and chest and front part of the neck are black. A white patch runs between these two colors. The tail is tipped black and there is a red, fleshy wattle in front of each eye, black-tipped red bill and the long legs are yellow. Males and females are similar in plumage but have a slightly longer wing and carpal spur.
